

webinar

Keep your workers sun-safe!

11/04/2024 10:00-12:00 (CET)

Programme

Opening & introduction

Prevention of occupational skin diseases caused by solar ultraviolet radiation

PD Dr. rer. nat. habil. Cara Symanzik, B.Sc., M.Ed.

Head of Skin Bioengineering Laboratory, Institute for Interdisciplinary Dermatological Prevention and Rehabilitation (iDerm) and Department of Dermatology, Environmental Medicine and Health Theory, Osnabrück University, Osnabrück, Germany

How do clothes protect you from solar UV radiation?

Silvia Torres Ruiz
Coordinator of the Physical and Mechanical Risks Area
INSST-CNMP, Seville, Spain

Practical Tips & Tools

Simon Boddy
European Technical Product Manager, SC Johnson Professional
Dr. rer. nat. Susanne Kemme
Scientific Communication, Peter Greven
Physioderm

Q & A Closing

Solar ultraviolet radiation (SUVR) can cause lasting damage to our skin, which can even result in skin cancer. Outdoor workers constitute a high risk group for developing occupational skin diseases by SUVR.

The good news: There are many effective preventive and protective measures for daily practice, which you will get to know in this webinar.

Workshop aimed at:

- OHS specialists concerned about the health of outdoor workers
- authorities (e.g. labour inspection)
- suppliers of skin care solutions and related services
- everyone with an interest in (occupational) sun protection

*Looking forward
to welcome you at the webinar!*

Participation is free of charge, but registration is required.

The link to join the webinar will be sent to registered persons a couple of days before the webinar.
